Education

The University of Texas at Dallas
Bachelor of Science in Computer Science

GPA: 3.6
December 2026

Experience

IBM

Software Developer Intern

May 2026 – August 2026

Austin, TX

- Built JS/TS LangGraph support to SDK/ADK, cutting migration time 90% and driving 1,500+ deployments in 30 days
- Shipped LangGraph persistence, enabling SQLite/Postgres memory for 50K+ MAUs and 500K+ monthly messages
- Fixed custom-agent token streaming regression by correcting message-delta handling and adding regression tests

Infosys

Software Engineer Intern

May 2025 – July 2025

Richardson, TX

- Built full-stack AI advisor platform using LangGraph, React, and Flask for autonomous agentic demos and playback
- Implemented RAG with Bedrock Titan embeddings and ChromaDB, improving semantic matching accuracy by 25%
- Built REST and WebSocket APIs enabling bidirectional React-to-LangGraph conversational streaming workflows
- Integrated AWS Transcribe with S3 demo videos to extract transcripts and enrich ChromaDB semantic retrieval

Metropak, LLC

IT Technician

March 2024 – May 2025

Richardson, TX

- Developed Saltbox REST API gateway with Vision33, reducing manual order-processing steps by 30%
- Maintained SQL-backed systems and VMware server infrastructure, sustaining 99.9% uptime for critical applications

Projects

Open Source Copilot SDK | *Java, Go, MCP, APIs*

[GitHub](#)

- Built Java testing infrastructure for MCP server connectivity and HTTP request callback validation
- Contributed Go SDK session configuration features and aligned API behavior across SDK implementations

Disaster Detection Model | *FastAPI, Celery, Redis, Gemini API, PostgreSQL*

[GitHub](#)

- Built async crisis alert workflows with FastAPI, Celery, Redis, Gemini API, PostgreSQL, user matching, and email alerts
- Integrated incident APIs delivering severity, location, and timestamps to Next.js live maps and analytics dashboards

Axxess Hackathon 2024 | *AI Challenge 1st Place* | *Flask, TensorFlow*

[GitHub](#)

- Built Flask video-analysis backend using TensorFlow MoveNet pose estimation to evaluate physical-therapy form
- Implemented joint-angle analysis against reference poses, reaching 85% accuracy and 1st place among 19 teams

Organizations

Association for Computing Machinery

Events Officer, Project Manager, Competitor

August 2023 – Present

University of Texas at Dallas

Dallas Formula Racing

Member

August 2022 – December 2023

University of Texas at Dallas

Technical Skills

Programming: Python, Java, C++, JavaScript, TypeScript, SQL, Bash/Shell Scripting

Frameworks/Libraries: Flutter, Angular, PyTorch, Flask, React, HuggingFace, LangChain, FastAPI, Pandas

Cloud/DevOps: AWS, GCP, Docker, Kubernetes, CI/CD, GitHub Actions, Azure, Linux, Terraform

Software: Figma, SAP, Jira, Linear, Power BI, Postman, Microsoft Dynamics, SharePoint, Git
